INTRODUCTION

(A) LETTER FROM THE MANAGING DIRECTOR

Dear Client,

*Today's security threats require serious responses by professionals to ensure that your facility does not present itself as a weak-link and a target of opportunity. Beyond guarding precious human life and valuable property, I take pride in providing a **SENSE** of **SECURITY**, a priceless and often elusive commodity. I established my company because I was not thrilled with the quality of security services that were available for hire on the market. I decided to offer a better service by drawing on my experience of 20 years in the Security Services Sector. It is therefore my personal mission to ensure that we hire exceptionally qualified Security personal, employ only seasoned supervisory staff and focus on clients that have reasons to be concerned about their vital interests.*

*I trust that you understand, and appreciate the fact that premium security service cannot, and will not, compete on the basis of the lowest bid price. I take pride in our services and trust that you will join a growing list of clients that have come to recognize that cost difference between exceptional security and average security is well worth the service and **PEACE OF MIND** that comes when **KHYBER SECURITY COMPANY** is on the job.*

*Thank you for considering **KHYBER SECURITY COMPANY (PVT) LTD.***

Sincerely

Chief Executive

Col. Naeem Asghar Teepu

(B) MANAGEMENT PHILOSOPHY

We believe in being pro-active, responsive, and customer centered. Early on, we decided to develop Khyber Security Company as a boutique service company for the premium services. We focus in addressing the challenges of clients who understand their needs and value the combination of our expertise, service and responsiveness. We believe that instead of trying to saturate a client with large number of inexperienced, low paid security guards and rows of poorly monitored cameras, Khyber Security Company actively engages with the task at hand and develops an effective set of operational methods for preventing security breaches. While no security apparatus is fail-proof, our philosophy is that a single trained security guard backed by an effective, computerized database and state of the art security technology, is far more effective than five poorly trained security guards who have a limited understanding of the "big picture".

*We believe that real security challenges require real security solutions by competent professionals. Anything else represents failure to acknowledge the obvious and worst, failure to address reasonably foreseeable liabilities. We provide thinking agents and on-site security directors and help our clients meet their obligation to provide a safe environment. We believe that good security is an attainable goat that is achieved through an unyielding executive commitment to methodical training, preparation and resources. When **YOU** are ready to explore the difference between "an ordinary security company" and real security from Khyber Security Company please call us for a confidential consultation.*
